# SAFETY MONDAY

## Housekeeping

Good housekeeping is essential for a safe and efficient work environment in the sanitation industry. Poor housekeeping can lead to slips, trip, and falls, equipment damage and even serious injuries.

### Key House Keeping Practices

- 1. Keep Walkways Clear** – Remove debris, spills, and obstructions from work areas and truck steps.
- 2. Proper Waste Handling** – Secure loose trash and properly dispose of hazardous materials to prevent exposure.
- 3. Organized Tools & Equipment** – Store brooms, shovels, and PPE in designated areas to prevent trip hazards.
- 4. Check for Spills & Leaks** – promptly clean up liquid spills such as hydraulic fluids to avoid slips.
- 5. Personal Responsibility** – Every employee plays a role in keeping work areas clean and safe. A clean workspace is a safe workspace – stay vigilant and take pride in maintaining a hazard-free environment!

Safety isn't just a rule – it's our responsibility. Stay alert, stay safe, and look out for each other every day! 🚚
