## A Clean Truck is a Safe Truck

With Spring right around the corner, don't forget about Spring Cleaning your truck!

There are many benefits to keeping your truck clean, both inside and out:

- **Safety:** Dirt, salt, and debris can cover up mirrors, lights, and sensors, **increasing your chance of an incident.** They can also corrode critical vehicle components. For CNG/LNG vehicles be sure to clean the pressure relief devices (vent tubes) of any road grime or debris.
- **Vehicle Reliability:** A clean truck performs better and is more reliably, keeping you on the road and not in the maintenance shop.
- **Driver Health:** A clean truck keeps dirt and dust out of the air you breathe and helps prevent spread of bacteria and mold.
- Not only does a **cluttered cab** look messy, but these items can **become a distraction.** And in the case of a collision, unsecured items can become projectiles inside the cab.
