SPRING INTO SAFE DRIVING

Warmer weather means more people are out walking, biking, and moving through neighborhoods and routes. Staying alert behind the wheel helps protect you, your team, and the public.

WHY IT MATTERS

SITUATIONAL AWARENESS

Distracted driving creates gaps in awareness around your vehicle.

LARGE BLIND SPOTS

Commercial vehicles have larger blind spots than passenger vehicles.

7,300 FATALITIES

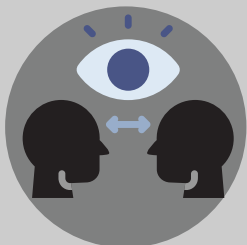

Distracted driving contributed to thousands of roadway deaths in 2023.

STAY ALERT ON THE ROUTE

WATCH FOR DISTRACTED PEDESTRIANS

People using earbuds or phones may not notice your vehicle.

MAKE EYE CONTACT

Confirm pedestrians see you before moving forward.

SCAN CONSTANTLY

Keep checking mirrors, surroundings, and movement zones.

A FEW SECONDS MATTER

At 35 mph, a 2-second distraction can mean 110 feet of missed roadway awareness.

PUT THE PHONE AWAY

Even hands-free calls can take your attention off the road.
